

Zero Bias Schottky Diodes for Mixers and Detectors

Technical Data

**HSCH-3206/07
HSCH-3486**

Features

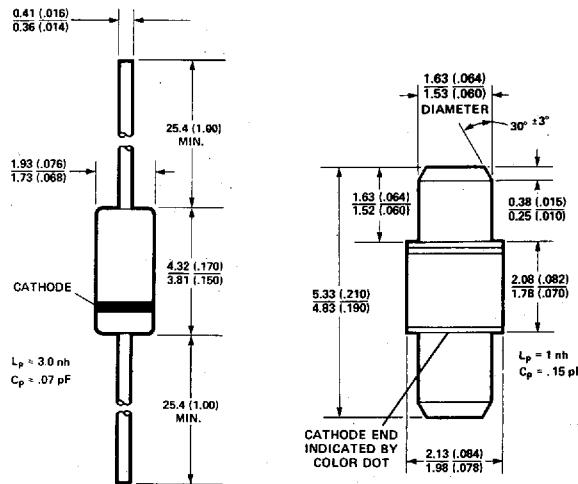

- High Voltage Sensitivity
- No Bias Required
- Choice of High or Low Video Impedance

Description/ Applications

The high zero bias voltage sensitivity of these Schottky barrier diodes makes them ideally suited for narrow bandwidth video detectors, ECM receivers, and measurement equipment. These diodes also make excellent mixers for use with low power LO.

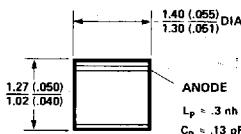

Package Characteristics

The HP Outline 15 package has a glass hermetic seal with gold plated Dumet leads which should be restricted so that the bend starts at least 1/16" (1.6 mm) from the glass body. With this restriction, it will meet MIL-STD-750, Method 2036, Condition A (4 lb. [1.8 kg] tension for 30 minutes). The maximum soldering temperature is 230°C for 5 seconds. Marking is by digital coding with a cathode band.

Outline 15

Outline 49

DIMENSIONS IN MILLIMETERS AND (INCHES).

Outline 44

The HP Outline 49 package has a metal-ceramic hermetic seal. The anode and cathode studs are gold-plated Kovar. The maximum soldering temperature is 230°C for 5 seconds. Stud-stud TIR is 0.010" max.

The HP Outline 44 package is a hermetically sealed ceramic package. The anode and cathode are gold-plated Kovar. The maximum soldering temperature is 230°C for 5 seconds.

Maximum Ratings

Operating and Storage Temperature Range -65°C to +150 °C
CW Power Dissipation at $T_{CASE} = 25^\circ C$

HSCH-3206, -3207 200 mW

HSCH-3486 300 mW

Derate Linearly to 0 W at 150°C

Pulse Power Dissipation at $T_{CASE} = 25^\circ C$

Peak power incident.

1 μ s pulse, $D_u = 0.001$ 1 W

These diodes are ESD sensitive. Handle with care to avoid static discharge through the diode.

Electrical Specifications at $T_A = 25^\circ C$

Part Number	Package Outline	Maximum Tangential Sensitivity TSS (dBm)	Minimum Voltage Sensitivity γ (mV/ μ W)	Video Resistance R_V (k Ω)	Typical Total Capacitance C_T (pF)
				Min. Max.	
HSCH-3207	44	-42	8	80 300	0.30
HSCH-3206	49	-42	8	80 300	0.30
HSCH-3486	15	-54	7.5	2 8	0.30
Test Conditions		Video Bandwidth = 2 MHz $f_{test} = 10$ GHz		Power in = -30 dBm $f_{test} = 10$ GHz $R_L = 10$ M Ω , $I_{bias} = 0$
